# 1987 INDEX

## A

Acoustical detection, insects (pat.), Jan-16
Aflatoxin fungus studied, Jun/Jul-4
AIDS research enlists fall armyworm, Oct-4
Alaska, cold climate agriculture, Oct-14
Alcohol from irradiated corn (pat.), Apr-16
Alfalfa, Nitro variety rebuilds soil, May-5
Alligatorweed, insect control of, May-6
Aluminum used in sugarbeet test, May-4
Ammonia, injected in hay bales, Sep-5
Antioxidants, nutritional role of, Jan-11
Apple storage, controlled atmosphere, Mar-14
Apricot juice, enzymes to clear, Sep-14
Asparagus fern, new edible variation, Oct-4

## B

*Bacillus thuringiensis*, monitoring its use (pat.), Oct-16
Bar codes track imported plants, Sep-4
Barley, crop for Alaska, Oct-14
Barley variety requires little water, Feb-5
Beef, pork becoming leaner, Apr-14
Bees spread mummy-berry disease, Aug-5
Bees, wild, for pollination, Aug-12
Berry virus, heat and carbon dioxide treatment for, Jan-4
Big vein disease in lettuce, Apr-5
Biocontrol
- good soil molds fight bad, Mar-6
- insects imported to combat leafy spurge, Jun/Jul-6
- naturally occurring herbicides (pat.), Jun/Jul-16
- wasp may help control cockroach, Feb-6
- waterweeds controlled by insects, fish, May-6
- when biological controls don't work, May-10

Bioengineered chickens, Mar-10
Blueberries, new hybrids, Jun/Jul-13
Boll weevil eliminated, Carolinas, Oct-9
Boron slows calcium loss, Nov/Dec-12

## C

Calcium loss slowed, boron, Nov/Dec-12
Carbon dioxide, treats berry virus, Jan-4.
Catfish farming in Oklahoma, Oct-6
Cattle
- grub control, Oct-13
- new test for Johne's disease, Oct-4
- weight gains on switchgrass, Feb-5

Chemical thermostats for fabrics, Apr-14
Cherry tree trunks gently shaken, Apr-13
Cherry, ornamental varieties at National Arboretum, May-12
Cicadas, brood emerges, Jun/Jul-5
Citrus
- debittering juices (pat.), Jan-16
- flavor components, orange juice, Mar-4
- picked by robots, Feb-14

Cockroach, Asian species in Florida, Feb-6
Computer predicts insect outbreaks, Apr-12
Conservation tillage with raised seedbeds, May-4
Controlled atmosphere storage, Mar-14
Corn
- borers stopped at action sites, Aug-9
- earworm moths, migratory pattern, Aug-9
- fungus *Aspergillus flavus*, Jun/Jul-4
- irradiated, alcohol from (pat.), Apr-16
- starch, new uses for surplus, Oct-11

Cryogenic strawberries, Jan-4

## D-E

Dairy Herd Improvement Association, Sep-9
Diabetes, exercise may lessen risk, Sep-4
Diabetes, starch relieves symptoms, Apr-5
DNA segments joined, oilseed protein, Aug-4
Dutch elm disease resistance, Jan-5
Earthworm, soybean roots follow holes, Mar-4
Elm trees grown from protoplasts, Jan-5
Enzymes speed fat hydrolysis (pat.), Oct-16
Enzymes clear apricot juice, Sep-14
Erosion controlled by planting barley, Feb-5
Erosion wind damage equation, Aug-13

## F

Fabric, thermal treated, Apr-14
Fabric treatment for dyeing (pat.), Feb-16
Fall armyworm cells in AIDS research, Oct-4
Fermentation, yeasts generate xylanase enzyme, Sep-14
Fingerprinting roses, Jun/Jul-15
Floral mimicry spreads mummy-berry fungus, Aug-5
Forage decisionmaking via computer program, Oct-10
Forum

- Strategic Controls Possible for Migratory Insects? Aug-2
- The Future of Nutrition Research, Jan-2
- Today's Plans, Tomorrow's Plants, Nov/Dec-2
- Toward a New Science of Trees, May-2
- Viroid Discoverer Receives the Wolf Prize, Mar-2

Fructose, low-cal sweeteners (pat.), Aug-16
Fruit, vitamin C controls browning, Aug-4
Fruit fly, male pheromones lure females, Nov/Dec-4
Fungus, cause of mummy-berry disease, Aug-5
Fungus helps soybeans, drought, Apr-4

## G

Genetic engineering of chickens, Mar-10
Germplasm preservation, Apr-6
Grain
- in-transit fumigation of, Jan-6
- predicting wheat development from air temperature, Mar-4
- *Pythium* fungus prevents germination, Feb-4
- wheat hardness test, Jan-13

Grass, Kentucky 31 tall fescue, Sep-12
GRIN, Germplasm Resources Information Network, Apr-6
Groundwater movement mapped, Jan-14
Gypsy moth eggs irradiated, May-15

## H

Hay bales injected with preservative, Sep-5
Heartwater disease test developed, Jun/Jul-5
Heel fly eradicated in Montana area, Oct-13
Hemorrhagic enteritis vaccine, Sep-11
Herbicide controls reed canarygrass, May-10
Herbicide, oilseed's resistance to, Sep-4
Highbush blueberry varieties, Jun/Jul-13
Horticultural displays at National Arboretum, May-11
Human milk, improved substitutes for, Mar-12
Hydrilla controls being developed, May-6
Hydrolysis of fats and oils (pat.), Sep-16

## I

Infant
- formula more like mother's milk, Mar-12
- formula with added lactoferrin, Oct-5
- growth related to digestion, Mar-12

Infrared light spots fabric deterioration, Jun/Jul-15

# 1987 INDEX

## A

Acoustical detection, insects (pat.), Jan-16
Aflatoxin fungus studied, Jun/Jul-4
AIDS research enlists fall armyworm, Oct-4
Alaska, cold climate agriculture, Oct-14
Alcohol from irradiated corn (pat.), Apr-16
Alfalfa, Nitro variety rebuilds soil, May-5
Alligatorweed, insect control of, May-6
Aluminum used in sugarbeet test, May-4
Ammonia, injected in hay bales, Sep-5
Antioxidants, nutritional role of, Jan-11
Apple storage, controlled atmosphere, Mar-14
Apricot juice, enzymes to clear, Sep-14
Asparagus fern, new edible variation, Oct-4

## B

*Bacillus thuringiensis*, monitoring its use (pat.), Oct-16
Bar codes track imported plants, Sep-4
Barley, crop for Alaska, Oct-14
Barley variety requires little water, Feb-5
Beef, pork becoming leaner, Apr-14
Bees spread mummy-berry disease, Aug-5
Bees, wild, for pollination, Aug-12
Berry virus, heat and carbon dioxide treatment for, Jan-4
Big vein disease in lettuce, Apr-5
Biocontrol
- good soil molds fight bad, Mar-6

Fruit, vitamin C controls browning, Aug-4
Fruit fly, male pheromones lure females, Nov/Dec-4
Fungus, cause of mummy-berry disease, Aug-5
Fungus helps soybeans, drought, Apr-4

## G

Genetic engineering of chickens, Mar-10
Germplasm preservation, Apr-6
Grain
- in-transit fumigation of, Jan-6
- predicting wheat development from air temperature, Mar-4
- *Pythium* fungus prevents germination, Feb-4
- wheat hardness test, Jan-13

Grass, Kentucky 31 tall fescue, Sep-12
GRIN, Germplasm Resources Information Network, Apr-6
Groundwater movement mapped, Jan-14
Gypsy moth eggs irradiated, May-15

## H

Hay bales injected with preservative, Sep-5
Heartwater disease test developed, Jun/Jul-5
Heel fly eradicated in Montana area, Oct-13
Hemorrhagic enteritis vaccine, Sep-11
Herbicide controls reed canarygrass, May-10
Herbicide, oilseed's resistance to, Sep-4
Highbush blueberry varieties, Jun/Jul-13
Horticultural displays at National Arboretum, May-11
Human milk, improved substitutes for, Mar-12
Hydrilla controls being developed, May-6
Hydrolysis of fats and oils (pat.), Sep-16

## I

Infant
- formula more like mother's milk, Mar-12
- formula with added lactoferrin, Oct-5
- growth related to digestion, Mar-12

Infrared light spots fabric deterioration, Jun/Jul-15

# 1987 INDEX

Insect
- control aboard ship, Jan-6
- corn borer, Aug-6
- cyclic return of cicada, Jun/Jul-5
- detection by sound (pat.), Jan-16
- eradication of boll weevil, Oct-9
- eradication of heel fly, Oct-13
- fruit fly pheromones, Nov/Dec-4
- gypsy moth eggs, May-15
- lesser mealworms, Jun/Jul-16
- Mediterranean fruit fly, Nov/Dec-16
- migration of cockroach, Feb-6
- migration of corn earworm tracked by radar, Aug-9
- outbreaks predicted by computer, Apr-12
- sweetpotato weevil, Apr-16
- wasps treated with rubidium, May-4

Insecticide, most effective use at at mating time, Aug-9
Interleukin is isolated from chickens (pat.), Nov/Dec-16
Iron-fiber in soybean hulls, Jun/Jul-4
Irradiating corn for alcohol production (pat.), Apr-l6
Irrigation valves, compressed air controls (pat.), Aug-16

## J-K-L

Japanese blackpine, roadside tree, Nov/Dec-4
Johne's disease, new test for, Oct-4
Kentucky 31 tall fescue, Sep-12
Lactoferrin spurs newborn infant development, Oct-5
Lambing, adjusting seasonal patterns, Sep-6
Lead, replaced by aluminum in test, May-4
Leafy spurge competes with range grass, Jun/Jul-6
Lettuce, new iceberg variety resistant to big vein, Apr-5
Light sensitivity of ticks measured, Mar-9

## M

Magnetic resonance imaging, new biotechnology, Nov/Dec-8
Mealworms, insecticides to control (pat.), Jun/Jul-16
Meat made leaner by new trimming methods, Apr-14
Meat restructured, Mar-5
Mediterranean fruit fly, new attractant (pat.), Nov/Dec-16
Mesquite pods as foodstuff, Jan-5
Milk production management, Sep-9
Molds, antibiotics in soil fight disease, Mar-6
Multidisciplinary approach to research, Feb-10
Mummy-berry disease, floral mimicry, Aug-5

## N

National Arboretum in blossom, May-11
National Plant Germplasm System, Apr-6
Nematodes assisted in swallowing nematicides (pat .), Feb-16
No-till farming creates snow blankets, Apr-4

## O

Oilseed, herbicide-resistance, Sep-4
Oilseed crops, artificial gene, Aug-4
Oklahoma, alternate crops for, Oct-6
Orange juice, 21 flavor chemicals, Mar-4

## P-Q

Paratuberculosis, new test for, Oct-4
Pheromone, fruit fly lure, Nov/Dec-4
Pheromone, sweetpotato weevil lure (pat.), Apr-16
Photoacoustic spectroscopic analysis, Jun/Jul-15
Pigs tested for trichinosis, Feb-15
Pines, salt-tolerant for roadside planting, Nov/Dec-4
Plastic film wrap preserves freshness in produce, Aug-15
Pollination, wild bees excel at it, Aug-12
Ponderosa pine as roadside tree, Nov/Dec-4
Psoriasis, relieved by vitamin D, Apr-4
*Pythium* fungus in old wheat seed, Feb-4
*Pythium*, control of, on small grain crops (pat.), Mar-16
Quarantined plant stock, tracking system, Sep-4

## R

Radar mapping underground water, Jan-14
Radar, tracking corn borers with, Aug-6
Rats, females outsurvive males, Mar-5
Rice , synthetic popcorn aroma, Feb-5
Ridge tillage gains in corn belt, May-4
Robot performs chemical analysis, Jan-15
Robot picks citrus fruit, Feb-14
Rooting gene in soybeans, Aug-5
Roses, piracy of gene stock, Jun/Jul-15
Rubidium to track wasps, May-4

## S

Seeds stored in very cold conditions, Apr-9
Selenium, nutritional role of, Jan-11
Sex bias in lab animal studies, Mar-5
Sheep, resetting biological clock of, Sep-6
Snow lessens subsurface frost, Apr-4
Soil, blowing quantified by equation, Aug-13
Soil improved by Nitro, a new alfalfa, May-5
Soybean
- beneficial genes inserted, Aug-5
- hulls source of iron fiber, Jun/Jul-4
- infected with beneficial bacteria (pat.), May-16
- roots follow wormholes, Mar-4

Sprengeri crossed with asparagus, Oct-4
Starch helps diabetes victims, Apr-5
Storage
- controlled atmosphere for fruit, Mar-14
- extreme cold, extends seed life, Apr-9
- individual wrapping of produce, Aug-15

Strawberry clones frozen, Jan-4
Stress tolerance in plants, Mar-8
Sugarbeet test uses aluminum, May-4
Sweetpotato weevil pheromone isolated (pat.), Apr-16
Switchgrass spurs cattle gain, Feb-5
Systemic protection from bloodsucking insects (pat.), Mar-16

## T-V

Tall fescue, *Acremonium coenophaialum*, Sep-12
Textiles, temperature-adaptive, Apr-14
Ticks carry heartwater disease, Jun/Jul-5
Ticks, color vision of, Mar-9
Timed-release of insecticides, herbicides (pat.), Mar-16
Trichinosis test is commercially licensed, Feb-15
Tripolyphosphate additive, meat, Mar-5
Turkey vaccine for hemorrhagic enteritis, Sep-11
VAM, vesicular arbuscular mycorrhizae, Apr-4
Vitamin C, robot chemist tests, Jan-15
Vitamin C , fruit browning, Aug-4
Vitamin D deficiency in elderly, Mar-11
Vitamin D hormone for psoriasis, Apr-4
Vitamin K, for blood clotting, Jun/Jul-l3

## W-X

Wasps tracked with rubidium, May-4
Weeds, leafy spurge, Jun/Jul-6
Weeds, witchweed, May-16
Wheat
- antibiotic for roots, Nov/Dec-4
- hardness test, Jan-13
- old seed invites *Pythium*, Feb-4
- predicting growth rate, Mar-4

Whooping crane, mysterious deaths, Nov/Dec-4
Wind erosion equation updated, Aug-13
Witchweed starved with strigol (pat.), May-l6
Wool, cleaned, more marketable, Apr-10
Wrinkle-resistant finishes (pat.), Sep-16
Xylanase enzyme ferments crop wastes, Sep-14
